The Dobe Ju Hoansi 4th Edition

The Dobe Ju’Hoansi - Lee 2012-02-01 This classic, bestselling study of the !Kung San, foragers of the Dobe area of the Kalahari Desert describes a people’s reactions to the forces of modernization, detailing relatively recent changes to !Kung rituals, beliefs, social structure, marriage and kinship system. It documents their determination to take hold of their own destiny, despite exploitation of their habitat and relentless development to assert their political rights and revitalize their communities. Use of the name Ju’hoansi (meaning “real people”) acknowledges their new sense of empowerment. Since the publication of the Third Edition in 2003, Richard Lee has made eight further trips to the Kalahari, the most recent in 2010 and 2011. The Dobe and Nyae Nyae Areas have continued to transform and the people have had to respond and adapt to the pressures of capitalist economics and bureaucratic governance of the Namibian and Botswana states. This Fourth Edition chronicles and bears witness to these evolving social conditions and their impacts on lives of the Ju’hoansi. Webs of Power - Evelyn Blackwood 2000 Webs of Power offers a fresh perspective on women in Southeast Asia. Although the book focuses on one village, it provides vital insights into the gendered processes of post-coloniality. By exploring the contestations and accommodations being made in rural villages by both men and women, Webs of Power reveals the processes at the heart of globalization as well as the complexities of power that circulate between women and men in a rural peasant society.

Kinship to Kingship - Christine Ward Gailey 2013-12-06 Have women always been subordinated? If not, why and how did women’s subordination develop? Kinship to Kingship was the first book to examine in detail how and why gender relations become skewed when classes and the state emerge in a society. Using a Marxist-feminist approach, Christine Ward Gailey analyzes women’s status in one society over three hundred years, from a period when kinship relations organized property, work, distribution, consumption, and reproduction to a class-based state society. Although this study focuses on one group of islands, Tonga, in the South Pacific, the author discusses processes that can be seen through the neocolonial world. This ethnohistorical study argues that evolution from a kin-based society to one organized along class lines necessarily entails the subordination of women. And the opposite is also held to be true: state and class formation cannot be understood without analyzing gender and the status of women. Of interest to students of anthropology, political science, sociology, and women’s studies, this work is a major contribution to social history.

Aleuts, Survivors of the Bering Land Bridge - William S. Laughlin 1980 Integrates ethnological, demographic, biological, archaeological and ecological information about the Alaskan Aleut people.

Picking Up: On the Streets and Behind the Trucks with the Sanitation Workers of New York City - Robin Nagle 2013-03-19 America's largest city generates garbage in torrents—11,000 tons from households each day on average. But New Yorkers don't give it much attention. They leave their trash on the curb or drop it in a litter basket, and promptly forget about it. And why not? On a schedule
so regular you could almost set your watch by it, someone always comes to take it away. But who, exactly, is that someone? And why is he—or she—so unknown? In Picking Up, the anthropologist Robin Nagle introduces us to the men and women of New York City's Department of Sanitation and makes clear why this small army of uniformed workers is the most important labor force on the streets. Seeking to understand every aspect of the Department's mission, Nagle accompanied crews on their routes, questioned supervisors and commissioners, and listened to stories after story about blizzards, hazardous wastes, and the insults of everyday New Yorkers. But the more time she spent with the DSNY, the more Nagle realized that observing wasn't quite enough—so she joined the force herself. Driving the hulking trucks, she obtained an insider's perspective on the complex kinships, arcane rules, and obscure lingo unique to the realm of sanitation workers. Nagle chronicles New York City's four-hundred-year struggle with trash, and traces the city's waste-management efforts from a time when filth overwhelmed the streets to the far more rigorous practices of today, when the Big Apple is as clean as it's ever been. Throughout, Nagle reveals the many unexpected ways in which sanitation workers stand between our seemingly well-ordered lives and the sea of refuse that would otherwise overwhelm us. In the process, she changes the way we understand cities—and ourselves within them.

**Cultural Anthropology** - Jack David Eller 2016-01-08 Cultural Anthropology: Global Forces, Local Lives presents all the key areas of cultural anthropology as well as providing original and nuanced coverage of current and cutting-edge topics. An exceptionally clear and readable introduction, it helps students understand the application of anthropological concepts to the contemporary world and everyday life. Thorough treatment is given throughout the text to issues such as globalization, colonialism, ethnicity, nationalism, neoliberalism, and the state. Changes for the third edition include a brand new chapter on medical anthropology and an updated range of cases studies with a fresh thematic focus on China. The book contains a number of features to support student learning, including: A wealth of color images Definitions of key terms and further reading suggestions in the margins Summaries at the end of every chapter An extensive glossary, bibliography and index.

**The Inconvenient Indigenous** - Sidsel Saugestad 2001 Saugestad examines the relationship between the government of Botswana and its indigenous minority, variously known as Bushmen, San, Basarwa, or more recently Noakwe.

**Mothers and Others** - Sarah Blaffer Hrdy 2011-04-15 Mothers and Others finds the key in the primatologically unique length of human childhood. Renowned anthropologist Sarah Hrdy argues that if human babies were to survive in a world of scarce resources, they would need to be cared for, not only by their mothers but also by siblings, aunts, fathers, friends—and, with any luck, grandmothers. Out of this complicated and contingent form of childrearing, Hrdy argues, came the human capacity for understanding others. In essence, mothers and others teach us who we will care, and who will not.

**Conformity and Conflict** - James P. Spradley 2012 Demonstrate the nature of culture and its influence on people's lives. For over 40 years, the best-selling Conformity and Conflict has brought together original readings and cutting edge research alongside classic works as a powerful way to study human behavior and events. Its readings cover a broad range of theoretical perspectives and demonstrate basic anthropological concepts. The Fourteenth Edition incorporates successful articles from past editions and fresh ideas from the field to show fascinating perspectives on the human experience. Teaching and Learning Experience Personalize Learning - MyAnthroLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking - Articles, article introductions and review questions encourage students to examine their assumptions, discern hidden values, evaluate evidence, assess their conclusions, and more! Engage Students - Section parts, key terms, maps, a glossary and subject index all spark student interest and illustrate the reader's main points with examples and visuals from daily life. Support Instructors - Teaching your course just got easier! You can create a Customized Text or use our Instructor's Manual, Electronic “MyTest” Test Bank or PowerPoint Presentation Slides. Additionally, Conformity and Conflict's part introductions parallel the basic concepts taught in introductory courses - which allow the book to be used as a complete reader or in conjunction with a main text. Note: MyAnthroLab does not come automatically packaged with this text. To purchase MyAnthroLab, please visit www.MyAnthroLab.com or you can purchase a valuepack of the text + MyAnthroLab (at no additional cost): VP ISBN-10: 0205176011/ISBN-13: 9780205176014

**Culture Sketches** - Holly Peters-Golden 2011 Ideal for any cultural anthropology course, this brief collection of ethnographic case studies exposes students to 15 different cultures. The groups selected are peoples whose traditional cultures are uniquely their own. Each has distinctive patterns and practices; each has faced the challenge of an encroaching world, with differing results. Moreover, they often provide the prime illustrations of important concepts in introductory anthropology course including Azande witchcraft, Ju/'hoansi egalitarianism, Trobriand kula exchange, and Minangkabau matriliny. As such, this volume can stand alone.

**The Gebusi** - Bruce Knauff 2015-10-22 One of the most popular anthropological case studies published in the last two decades, the latest edition of The Gebusi incorporates important new fieldwork, bringing ethnographic excellence and a riveting story fully up to date. Readers are welcomed into the lives of Papua New Guinea rainforest dwellers to witness a dramatic arc of cultural change and human transformation. When Knauff first studied them, Gebusi practiced powerful spirit séances and sorcery divinations, held resplendent initiations that included distinctive sexual customs, and endured high rates of violence. Sixteen years later, he found them participating in market activity, schooling, government programs, and sports; performing their own popular music; and practicing Christianity. More recently, Gebusi have been battered by economic hardship and withdrawal of government services—but have admirably revitalized their
culture and livelihood. Sustained by traditions, access to land and waterways, and a keen sense of humor and vitality, Gebusi exhibit resilience and dignity amid conditions of continuing uncertainty and change. An absorbing, well-written, and humanistic account based on profound scholarship, The Gebusi, 4/E includes end-of-chapter “Broader Connections” that link Gebusi experiences to major anthropological topics—subsistence, kinship and marriage, politics, religion, gender and sexuality, ethnicity, nationalism, modernity, and the ethics of engaged and applied anthropology. A stunning full-color photo insert accentuates Knauft’s absorbing narrative. Callouts to instructional videos recorded with Gebusi and to an extensive online image bank on the author’s website further enrich the ethnography.

The Yanomamo + the Dobe Ju / Hoansi, 4th Ed. + the Trobrianders of Papua New Guinea-Napoleon A. Chagnon 2012

Slaughterhouse Blues: The Meat and Poultry Industry in North America-Donald D. Stull 2012-01-01 An expanded second edition of SLAUGHTERHOUSE BLUES: THE MEAT AND POULTRY INDUSTRY IN NORTH AMERICA is now available. The authors, a cultural anthropologist and a social geographer, draw on three decades of research to present a detailed look at the modern meat and poultry industry in the United States and Canada. Following chapters on industrial beef, poultry, and pork production, SLAUGHTERHOUSE BLUES scrutinizes industry impacts on farmers and ranchers, processing workers, and on the communities that host its plants. The book details the authors' efforts to help communities plan for and mitigate the negative consequences of meat and poultry plants as well as community opposition to confined animal feeding operations. The second edition includes recent research and up-to-date information on industry and consumer trends. A new chapter, Is Meat Murder? examines the growing public concern with animal rights and animal welfare. The book concludes with a look at the health and social consequences of the present system of meat production before exploring alternatives to North America’s model of industrialized meat. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Soft Computing Applications and Intelligent Systems-Shahrul Azman Noah 2013-08-16 This book constitutes the refereed proceedings of the International Second International Multi-Conference on Artificial Intelligence Technology, M-CAIT 2013, held in Shah Alam, in August 2013. The 25 revised full papers presented were carefully reviewed and selected from 110 submissions. M-CAIT 2013 hosted four special tracks in a single event: Intelligence Computation on Pattern Analysis and Robotics (ICPAIR 2013), Data Mining and Optimization (DMO 2013), Semantic Technology and Information Retrieval (STAIR 2013) and Industrial Computing & Applied Informatics (IComp 2013). The papers address issues of state-of-the-art research, development, implementation and applications within the four focus areas in CAIT: pattern recognition, data mining and optimization, knowledge technology and industrial computing.

Proceedings of 3rd International Conference on Advanced Computing, Networking and Informatics-Atulya Nagar 2015-09-03 Advanced Computing, Networking and Informatics are three distinct and mutually exclusive disciplines of knowledge with no apparent sharing/overlap among them. However, their convergence is observed in many real world applications, including cyber-security, internet banking, healthcare, sensor networks, cognitive radio, pervasive computing amidst many others. This two volume proceedings explore the combined use of Advanced Computing and Informatics in the next generation wireless networks and security, signal and image processing, ontology and human-computer interfaces (HCI). The two volumes together include 132 scholarly articles, which have been accepted for presentation from over 550 submissions in the Third International Conference on Advanced Computing, Networking and Informatics, 2015, held in Bhubaneswar, India during June 23-25, 2015.

Yanomamö, the Fierce People-Napoleon A. Chagnon 1977 “Yanomamö culture, in its major focus, reverses the meanings of "good" and "desirable" as phrased in the ideal postulates of the Judaic-Christian tradition. A high capacity of rage, a quick flash point, and a willingness to use violence to obtain one's ends are considered desirable traits. Much of the behavior of the Yanomamö can be described as brutal, cruel, treacherous, in the value-laden terms of our own vocabulary. The Yanomamö themselves, however, as Napoleon Chagnon came to intimately know them in the year and a half he lived with them, do not all appear to be mean and treacherous. As individuals, they seem to be people playing their own cultural game, with internal feelings that at times may be quite divergent from the demands placed upon them by their culture. This case study furnishes valuable data for phrasing questions about the relationship between the individual and his culture.”-- Foreword.

Cuckoo Search and Firefly Algorithm-Xin-She Yang 2013-10-31 Nature-inspired algorithms such as cuckoo search and firefly algorithms have become popular and widely used in recent years in many applications. These algorithms are flexible, efficient and easy to implement. New progress has been made in the last few years, and it is timely to summarize the latest developments of cuckoo search and firefly algorithm and their diverse applications. This book will review both theoretical studies and applications with detailed algorithm analysis, implementation and case studies so that readers can benefit most from this book. Application topics are contributed by many leading experts in the field. Topics include cuckoo search, firefly algorithm, algorithm analysis, feature selection, image
processing, travelling salesman problem, neural network, GPU optimization, scheduling, queuing, multi-objective manufacturing optimization, semantic web service, shape optimization, and others. This book can serve as an ideal reference for both graduates and researchers in computer science, evolutionary computing, machine learning, computational intelligence, and optimization, as well as engineers in business intelligence, knowledge management and information technology.

The Paleoanthropology and Archaeology of Big-Game Hunting-John D. Speth 2010-09-08 Since its inception, paleoanthropology has been closely wedded to the idea that big-game hunting by our hominin ancestors arose, first and foremost, as a means for acquiring energy and vital nutrients. This assumption has rarely been questioned, and seems intuitively obvious—meat is a nutrient-rich food with the ideal array of amino acids, and big animals provide meat in large, convenient packages. Through new research, the author of this volume provides a strong argument that the primary goals of big-game hunting were actually social and political—increasing hunter's prestige and standing—and that the nutritional component was just an added bonus. Through a comprehensive, interdisciplinary research approach, the author examines the historical and current perceptions of protein as an important nutrient source, the biological impact of a high-protein diet and the evidence of this in the archaeological record, and provides a compelling reexamination of this long-held conclusion. This volume will be of interest to researchers in Archaeology, Evolutionary Biology, and Paleoanthropology, particularly those studying diet and nutrition.

The Psychology of Social Status-Joey T. Cheng 2014-09-09 The Psychology of Social Status outlines the foundational insights, key advances, and developments that have been made in the field thus far. The goal of this volume is to provide an in-depth exploration of the psychology of human status, by reviewing each of the major lines of theoretical and empirical work that have been conducted in this vein. Organized thematically, the volume covers the following areas: - An overview of several prominent overarching theoretical perspectives that have shaped much of the current research on social status. - Examination of the personality, demographic, situational, emotional, and cultural underpinnings of status attainment, addressing questions about why and how people attain status. - Identification of the intra- and inter-personal benefits and costs of possessing and lacking status. - Emerging research on the biological and bodily manifestation of status attainment. - A broad review of available research methods for measuring and experimentally manipulating social status. A key component of this volume is its interdisciplinary focus. Research on social status cuts across a variety of academic fields, including psychology, sociology, anthropology, organizational science others; thus the chapter authors are drawn from a similarly wide-range of disciplines. Encompassing the current state of knowledge in a thriving and proliferating field, The Psychology of Social Status is a fascinating and comprehensive resource for researchers, students, policy-makers, and others interested in learning about the complex nature of social status, hierarchy, dominance, and power.

Cultural Anthropology A Toolkit for a Global Age-Kenneth J Guest 2016-10-11 The Second Edition of Ken Guest's Cultural Anthropology: A Toolkit for a Global Age covers the concepts that drive cultural anthropology by showing that now, more than ever, global forces affect local culture and the tools of cultural anthropology are relevant to living in a globalizing world.

The Trouble with Human Nature-Elizabeth D. Whitaker 2017-02-03 The Trouble with Human Nature brings together biological and cross-cultural evidence to critically examine common preconceptions and challenge popular assumptions about human nature. It sets out to counter genetic and evolutionary myths about human variation and behavior, drawing on both biological and cultural anthropology, as well as from other disciplines including psychology, economics, and sociology. The chapters address the interrelated topics of health and disease, gender and other differences, and violence and conflict. The analysis calls into question the presumed natural foundation for social inequalities and sheds light on both the constraints and possibilities inherent in the human condition. This book provides students of human diversity and evolution with an excellent resource to better approach questions relating to human nature. It will also be of interest to those taking courses in social, cultural, and biological anthropology, as well as public health, medical anthropology, sociology, gender studies, psychology, and kinship studies.

Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms-Bo Xing 2013-12-13 The first notable feature of this book is its innovation: Computational intelligence (CI), a fast evolving area, is currently attracting lots of researchers' attention in dealing with many complex problems. At present, there are quite a lot competing books existing in the market. Nevertheless, the present book is markedly different from the existing books in that it presents new paradigms of CI that have rarely been mentioned before, as opposed to the traditional CI techniques or methodologies employed in other books. During the past decade, a number of new CI algorithms are proposed. Unfortunately, they spread in a number of unrelated publishing directions which may hamper the use of such published resources. These provide us with motivation to analyze the existing research for categorizing and synthesizing it in a meaningful manner. The mission of this book is really important since those algorithms are going to be a new revolution in computer science. We hope it will stimulate the readers to make novel contributions or even start a new paradigm based on nature phenomena. Although structured as a textbook, the book's straightforward, self-contained style will also appeal to a wide audience of professionals, researchers and independent learners. We believe that the book will be instrumental in initiating an integrated approach to complex problems by allowing cross-fertilization of design principles from different design philosophies. The second feature of this book is its comprehensiveness: Through an extensive literature research, there are 134 innovative CI algorithms covered in this book.

The Cambridge Handbook of Play-Peter K. Smith 2018-11-15 Play takes up much of the time budget of young children, and many animals, but its importance in development remains contested. This comprehensive collection brings together multidisciplinary and developmental perspectives on the forms and functions of play in animals, children in different societies, and through the lifespan. The Cambridge Handbook of Play covers the evolution of play in animals, especially mammals; the development of play from infancy through childhood and into adulthood; historical and anthropological perspectives on play; theories and methodologies; the role of play in...
children's learning; play in special groups such as children with impairments, or suffering political violence; and the practical applications of playwork and play therapy. Written by an international team of scholars from diverse disciplines such as psychology, education, neuroscience, sociology, evolutionary biology and anthropology, this essential reference presents the current state of the field in play research.

Emergent Warfare in Our Evolutionary Past-Nam C Kim 2018-03-13 Why do we fight? Have we always been fighting one another? This book examines the origins and development of human forms of organized violence from an anthropological and archaeological perspective. Kim and Kissel argue that human warfare is qualitatively different from forms of lethal, intergroup violence seen elsewhere in the natural world, and that its emergence is intimately connected to how humans evolved and to the emergence of human nature itself.

Applications of Cuckoo Search Algorithm and its Variants-Nilanjan Dey 2020-06-23 This book highlights the basic concepts of the CS algorithm and its variants, and their use in solving diverse optimization problems in medical and engineering applications. Evolutionary-based meta-heuristic approaches are increasingly being applied to solve complicated optimization problems in several real-world applications. One of the most successful optimization algorithms is the Cuckoo search (CS), which has become an active research area to solve N-dimensional and linear/nonlinear optimization problems using simple mathematical processes. CS has attracted the attention of various researchers, resulting in the emergence of numerous variants of the basic CS with enhanced performance since 2019.

The !Kung San-Richard Borshay Lee 1979-12-12 For most of human history hunting and gathering was a universal way of life. Richard Borshay Lee spent over three years conducting fieldwork among the !Kung San, an isolated population of 1,000 in northern Botswana. When Lee began his work in 19863, the !Kung San were one of the last of the world’s people to live this life. By 1973, when Lee last lived with the group, it appeared that they !Kung were a society on the threshold of a transformation that signalled the end of foraging as an independent way of life, at least in Africa. The !Kung San: Men, Women and Work in a Foraging Society, an ecological and historical study, is Professor Lee's major statement on his research. By maintaining simultaneous historical and synchronic perspectives, Lee is able to extend his analysis of core features from the contemporary !Kung to prehistoric societies. These basic principles become the means to understanding the form of human life that has been obscured by the developments and complications of societies during the last few thousand years.

World Prehistory and Archaeology-Michael Chazan 2015-10-05 An integrated picture of prehistory as an active process of discovery. World Prehistory and Archaeology: Pathways through Time, third edition, provides an integrated discussion of world prehistory and archaeological methods. This text emphasizes the relevance of how we know and what we know about our human prehistory. A cornerstone of World Prehistory and Archaeology is the discussion of prehistory as an active process of discovery. Methodological issues are addressed throughout the text to engage readers. Archaeological methods are introduced in the first two chapters. Succeeding chapters then address the question of how we know the past to provide an integrated presentation of prehistory. The third edition involves readers in the current state of archaeological research, revealing how archaeologists work and interpret what they find. Through the coverage of various new research, author Michael Chazan shows how archaeology is truly a global discipline. Learning Goals Upon completing this book, readers will be able to: * Gain new perspectives and insights into who we are and how our world came into being. * Think about humanity from the perspective of archaeology. * Appreciate the importance of the archaeological record for understanding contemporary society.

Shadowed Lives: Undocumented Immigrants in American Society-Leo R. Chavez 2012-03-12 One of the few case studies of undocumented immigrants available, this insightful anthropological analysis humanizes a group of people too often reduced to statistics and stereotypes. The hardships of Hispanic migration are conveyed in the immigrants' own voices while the author's voice raises questions about power, stereotypes, settlement, and incorporation into American society. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Trobrianders of Papua New Guinea-Annette B. Weiner 1988 Book about the social life and customs of the Trobriand Islanders of Papua New Guinea

The Road to Revolution-Theodore John Kaczynski 2008

Indigenous Peoples' Rights in Southern Africa-Robert K. Hitchcock 2004 This book is concerned with the first peoples (those people who are considered indigenous by themselves and others) of southern Africa such as the San, the Nama, and the Khoi, and their rights. Although living in democratic countries like Namibia, South Africa, Zimbabwe, and Botswana --and in principle sharing the same rights and responsibilities as the rest of the population--practice shows that these peoples more often than not are at the margins of the
societies in which they live; they often face extreme poverty, and they frequently are subjected to discriminatory treatment and exposed to all kinds of human rights abuses. Robert K. Hitchcock is professor of anthropology and geography at the University of Nebraska-Lincoln, USA. He has done extensive research and development work in southern Africa in general and among San peoples in particular. Dina Vinding is an anthropologist working with the International Work Group for Indigenous Affairs (IWGIA) in Copenhagen.

**Indigenous Peoples, Consent and Benefit Sharing** - Rachel Wynberg 2009-09-30 Indigenous Peoples, Consent and Benefit Sharing is the first in-depth account of the Hoodia bioprospecting case and use of San traditional knowledge, placing it in the global context of indigenous peoples’ rights, consent and benefit-sharing. It is unique as the first interdisciplinary analysis of consent and benefit sharing in which philosophers apply their minds to questions of justice in the Convention on Biological Diversity (CBD), lawyers interrogate the use of intellectual property rights to protect traditional knowledge, environmental scientists analyse implications for national policies, anthropologists grapple with the commodification of knowledge and, uniquely, case experts from Asia, Australia and North America bring their collective expertise and experiences to bear on the San-Hoodia case.

**Toxicology in Antiquity** - 2018-10-22 Toxicology in Antiquity provides an authoritative and fascinating exploration into the use of toxins and poisons in antiquity. It brings together the two previously published shorter volumes on the topic, as well as adding considerable new information. Part of the History of Toxicology and Environmental Health series, it covers key accomplishments, scientists, and events in the broad field of toxicology, including environmental health and chemical safety. This first volume sets the tone for the series and starts at the very beginning, historically speaking, with a look at toxicology in ancient times. The book explains that before scientific research methods were developed, toxicology thrived as a very practical discipline. People living in ancient civilizations readily learned to distinguish safe substances from hazardous ones, how to avoid these hazardous substances, and how to use them to inflict harm on enemies. It also describes scholars who compiled compendia of toxic agents. New chapters in this edition focus chiefly on evidence for the use of toxic agents derived from religious texts. Provides the historical background for understanding modern toxicology illustrates the ways previous civilizations learned to distinguish safe from hazardous substances, how to avoid the hazardous substances and how to use them against enemies. Explores the way famous historical figures used toxins. New chapters focus on evidence of the use of toxins derived from religious texts.

**Culture Counts** - Serena Nanda 2021-09-28 Now with SAGE Publishing! Culture Counts is a concise introduction to anthropology that illustrates why culture matters in our understanding of humanity and the world around us. Serena Nanda and Richard L. Warms draw students in with engaging ethnographic stories and a conversational writing style that encourages them to interact cross-culturally, solve problems, and effect positive change. The brief format gives majors and non-majors the essentials they need and frees up the instructor to teach the course the way they want to teach it. The Fifth Edition includes new examples and vignettes that are important to the study of cultural anthropology. Issues of gender, identity, globalization, intersectionality, inequality, and public health have been incorporated throughout the book, as well as a new chapter on race and ethnicity that brings the book in step with recent conversations about power, race, and history. This title is accompanied by a complete teaching and learning package. Contact your SAGE representative to request a demo. Digital Option / Courseware SAGE Vantage is an intuitive digital platform that delivers this text’s content and course materials in a learning experience that offers auto-graded assignments and interactive multimedia tools, all carefully designed to ignite student engagement and drive critical thinking. Built with you and your students in mind, it offers simple course set-up and enables students to better prepare for class. Assignable Video with Assessment Assignable video (available with SAGE Vantage) is tied to learning objectives and curated exclusively for this text to bring concepts to life. Watch a sample video now. LMS Cartridge: Import this title’s instructor resources into your school’s learning management system (LMS) and save time. Don’t use an LMS? You can still access all of the same online resources for this title via the password-protected Instructor Resource Site.
