Distributive justice and the New Medicine-George Patrick Smith 2010-01-01 Smith has packed an incredible amount of information into this relatively short and clearly written book. His erudition is unquestionable, and his knowledge of current trends in medical technology and the ethical issues surrounding them is obvious on every page. P. Jenkins, Choice George P. Smith is one of the world’s leading experts on the legal and ethical issues raised by modern medicine. His book is a wide-ranging and deeply informed and considered analysis of those issues, with particular emphasis on the inequality with which the benefits of modern medicine are bestowed on the sick. Knowledgeable as well about the technical aspects of the biomedical revolution, Smith writes with insight and authority, and offers a perspective that will influence the policy debates. Richard A. Posner, United States Court of Appeals for the Seventh Circuit and University of Chicago Law School, US While much has been written about the various issues addressed in this book genetics, cloning, informed consent, organ donation Smith s book moves beyond traditional legal analysis, tying these issues together by examining them through the lens of distributive justice. He thus provides the reader with a unique and valuable lens of perspective on this important area. Distributive Justice and the New Medicine will be of interest to all those interested in health law and bioethics and in particular for those interested in distributive justice. Belinda Bennett, Journal of Law, Social Justice and Global Development Professor George P. Smith’s Distributive Justice and the New Medicine is a major new work by one of the world’s leading medical lawyers. This book brings important new insights into the complex area of rationing health care resources and should be read by anyone interested in seeking to create a just society. Jonathan Herring, Exeter College, University of Oxford, UK Is the advancement of scientific knowledge and the development of biomedical technologies known as the New Medicine desirable? George P. Smith asks this fundamental question while also confronting the distribution of these scarce medical resources. Law, economics, medical science, philosophy and ethics all coalesce in this discussion of how to structure normative standards of conduct that will improve the quality of life. The author begins by examining various economic constructs as aids for achieving a fair and equitable delivery of health care services. He then assesses their level of practical application and evaluates the costs and benefits to society of pursuing the development and use of the New Medicine. The book ends with a case study of organ and tissue transplantation that illustrates the implementation of distributive justice. The author concludes that as long as clinical medicine maintains its focus on healing and alleviating suffering among patients, a point of equilibrium will be reached that advances the common good. This timely and compelling exploration will be a must-read for scholarly, researchers, policymakers and all those interested in advances in medical technology and the issues surrounding access to health care.

Neurologic Interventions for Physical Therapy-Suzanne C. Martin 2007-01-01 Master the role of the physical therapist or physical therapist assistant in neurologic rehabilitation! Neurologic Interventions for Physical Therapy, 3rd Edition helps you develop skills in the treatment...
interventions needed to improve the function of patients with neurologic deficits. It provides a solid foundation in neuronomogy, motor control, and motor development, and offers clear, how-to guidelines to rehabilitation procedures. Case studies help you follow best practices for the treatment of children and adults with neuromuscular impairments caused by events such as spinal cord injuries, cerebral palsy, and traumatic brain injuries. Written by physical therapy experts Suzanne 'Tiny' Martin and Mary Kessler, this market-leading text will help you prepare for the neurological portion of the PTA certification exam and begin a successful career in physical therapy practice. Comprehensive coverage of neurolologic rehabilitation explores concepts in neuronomogy, motor control and motor learning, motor development, and evidence-based treatment of adults and children with neuromuscular impairments. Over 700 photos and drawings clarify concepts, show anatomy, physiology, evaluation, and pathology, and depict the most current rehabilitation procedures and technology. Case studies demonstrate the patient examination and treatment process, and show how to achieve consistency in documentation. Proprioceptive Neuromuscular Facilitation chapter describes how PNF can be used to improve a patient's performance of functional tasks by increasing strength, flexibility, and range of motion - key to the treatment of individuals post-stroke. Review questions are included at the end of each chapter, with answers at the back of the book. Illustrated step-by-step intervention boxes, tables, and charts highlight important information, and make it easy to find instructions quickly. Use of language of the APTA Guide to Physical Therapist Practice ensures that you understand and comply with best practices recommended by the APTA. NEW photographs of interventions and equipment reflect the most current rehabilitation procedures and technology. UPDATED study resources on the Evolve companion website include an intervention collection, study tips, and additional review questions and interactive case studies.

A History of the Thomas Jefferson School of Law-Kenneth J. Vandevelde 2013-05-07 “The Thomas Jefferson School of Law originated in the 1960s as the San Diego branch campus of a for-profit, non-ABA accredited Orange County law school that served principally part-time evening students. Although it was proud of educating working adults and produced some outstanding alumni, its attrition rates ranged between 50 and 75 percent and its pass rate on the California bar exam sometimes fell below 25 percent. In a half dozen years during the 1990s, the law school radically transformed itself. It separated from its parent, adopted a new name, became the first for-profit law school to gain ABA accreditation, and converted to a nonprofit. Admissions applications soared tenfold resulting in a nationally based student body second in California only to Stanford’s for geographic diversity. The academic dismissal rates dropped below 10 percent and its California bar pass rates climbed above 75 percent. Graduates received offers from prestigious law firms in New York, Los Angeles and other cities. The law school was ranked 5th in the...
