Teaching Transparency The Electromagnetic Spectrum

Exploring Light: Absorb, Refract, or Reflect

In a hand-on way, students explore light’s properties of absorption, reflection, transmission and reflection through various experimental stations within the classroom. To understand absorption, reflection and transmission, they shine flashlights on a number of provided objects. To understand reflection, students create indoor mirrors. An understanding of the fundamental properties of light.

Teaching | Learning

Teaching via video can be synchronous like a live webinar or Zoom conference, but there are many other methods, including asynchronous video, to enhance your students’ online learning environment. In these COVID times, with so many instructors new to online teaching and attempting to provide or mimic the face-to-face learning environment.

2022 Observer’s Handbook

Oct 15, 2021 · Published annually by the Royal Astronomical Society of Canada, Observer’s Handbook 2022 is the essential reference for professional astronomers, amateur observers, teachers, and everyone who enjoys the night sky. This special USA Edition includes American usage and references to U.S. cities. The editors of Astronomy magazine use and recommend this comprehensive guide, which ...

What is the Materials Science Tetrahedron (Paradigm)

The materials science tetrahedron defines the scope of materials science and engineering. The tetrahedron emphasizes the four independent, distinct corners of materials science: processing, structure, properties, and performance. These “corners” of the tetrahedron may seem simple, but from an educational point of view, it is critical to identify what students learn about each corner.
