The Uybat Inscriptions contact. All major branches of the Turkic languages are covered, with the focus of the individual contributions either on synchronic and diachronic issues are addressed. There are contributions with either a descriptive or a theoretical bias.

Structural Factors in Turkic Language Contacts

Diachrony of Verb Morphology

The book is intended for use by students at university level as well as by general readers with a basic knowledge of Turkish Studies. It presents the history and cultures of the speakers, structures, and use of the whole set of languages within the family, including Turkish, Avat, Turkmen, Tatar, Kazak, Uighur, and others. It gives a comprehensive overview of published works on Turkic languages, large and small. It also provides an innovative theoretical framework, employing a unified terminology and transcription, to give new insights into the Turkic Languages. Requiring no previous knowledge of the Turkic languages, it will be welcomed by both general readers, as well as academic researchers and students of linguistic typology, comparative linguistics, and Turkic studies.

Language and Literature

First Published in 1999. Routledge is an imprint of Taylor & Francis, an Informa company. This volume contains contributions in English and German on various topics of linguistic typology. All contributors are in some way associated with the typological department in Mainz. The articles cover a broad spectrum of linguistic fields such as syntax, morphology, semantics, pragmatics, lexicon, onomatopoeia, sociolinguistics, and language contact.

Interpreting the Turkic Runiform Sources and the Position of the Altai Corpus

The World of the Khazars

Turkic languages present particularly rich sources of data for the study of language contact, as linguistic descriptions of the individual languages themselves. Each language description gives an overview of the language followed by detail on phonology, morphology, syntax, lexis and dialects. The language chapters are similarly structured to enable the reader to access and compare information easily. Each chapter represents a self-contained article written by a recognized expert in the field. Suggestions are made for the most useful sources of further reading and the work is comprehensively indexed.

In Old Turkic Word Formation

First Published: 31 March 2020

This handbook comprises an in-depth presentation of the state of the art in word-formation. The five volumes contain 207 articles written by leading international scholars. The XVI chapters of the handbook provide the reader, in both general articles and individual studies, with a wide variety of perspectives: word-formation as a linguistic discipline (history of science, theoretical concepts), units and processes in word-formation, rules and restrictions, semantic and pragmatic, foreign word-formation, language planning and planning, historical word-formation, word-formation in language acquisition and aphasia, word-formation and language use, tools in word-formation research. The final chapter comprises 74 portraits of word-formation in the individual languages of Europe and Asia, offers an innovative perspective. These portraits afford the first overview of this kind and will prove useful for future typological research. This handbook will provide an essential reference for all students and researchers in word-formation and related fields within linguistics.

The Old Turkic Yenisei Inscriptions have been significantly less thoroughly investigated than the famous Olturian inscriptions, and many palaeographic, grammatical, and lexical aspects are still insufficiently examined. This book is the first monograph study of eight inscriptions found near the Uybat River in Khakassia, seven of which are engraved in stone, one in rock. The inscriptions represent a self-contained article written by a recognized expert in the field. Suggestions are made for the most useful sources of further reading and the work is comprehensively indexed.

In the bottom of a silver vessel. Although all but one of the inscriptions have been the object of research, many students are encouraged. The present study collects and compares all relevant information available on the Cyrillic inscriptions and provides a thorough, revised analysis of the texts. Every inscription is presented in transcription, transcription and translation, with detailed metrical analysis, exhaustive information on the graphemes and a comprehensive critical apparatus. The book also contains a glossary of all identifiable lexemes and a morphology index. Drawings, photographs and facsimiles are given in the appendix. The study contributes to our understanding of the language, script, and culture of the Old Turkic civilization in the Yenisei area and can serve as a model for further studies on individual inscription groups.

The book includes an introduction, a transcription, an annotated English translation, seven lexica and two manuscripts in facsimile.
