Vaal Triagle Application Forms For 2015

An Introduction to Namibian Law - Amor, S.K. 2019-04-15 The author of this book, Prof. S.K. Amor, is Acting Director of the Justice Training Centre and lecturer at the University of Namibia. The writing of this book was inspired mainly by the fact that, despite Namibia's independence in 1990, Namibian legal practitioners, academics and students lecturing and studying law at the University of Namibia (UNAM) still do not have a truly Namibian reference book. Instead, they rely heavily on legal literature from South Africa and other countries. An Introduction to Namibian Law is an attempt to bridge this gap by introducing law academics, lecturers and students to the most important aspects of Namibian law. It explains the origin of the country's law and looks at the various influences over the years. The book contains material covered in various UNAM courses, such as Jurisprudence, Introduction to Cases, Comparative Law, Constitutional and Administrative Law, Interpretation of Statutes, and Civil and Criminal Procedure. It also contains various extracts in support of legal arguments, in which legal concepts are illustrated and thoroughly explained, as well as sample legal forms. Full accounts of certain cases are included to give students of Namibian law a depth of understanding of how Namibian law has been applied over the years.

Carrots and Sticks - Jeremy Sarkin-Hughes 2004 This book is about the South African amnesty process. Many of the most well-known cases are investigated: the Cradock Four, the Pelco Three, the St James' Church, Hesdellberg Tavern, Bahu, Bopatsong, Trust Feeds and KwaMakutha massacres; the killing of Amy Biehl, Chris Hani, Steve Biko, Stanna Bopape, Fabian and Florence Ribeiro; the Motherwell, Magoos Bar, Ellis Park Rugby Stadium, Church Street and Wimpy bombings, the Craig Duli coup, the applications of Craig Williamson, Trevor Tutu, Eugene de Kock and Jeffrey Benzien, the collective applications of the ANC 37 and APLA leaders, the Jerry Richardson case involving Winnie Madikizela-Mandela, and amnesty cases stemming from the Magnus Malan trial. The content of many of the amnesty decisions are investigated to see how the Amnesty Committee applied the amnesty law and whether the decisions were fair and consistent. The book examines the amnesty application numbers - the number of 'legitimate' applications, the spread across political affiliation, the number of female applicants, and who is a victim and who is a perpetrator. It looks at the extent to which the indemnity process that occurred between 1990 and 1995 undermined the 'carrot' of amnesty, whether the criminal justice system offered a sufficient 'stick' to coax potential applicants into the process, and how timing of events and attitudes of political parties influenced applications. Also considered is the timing of hearings, the role of the investigations Unit, and the way in which the Amnesty Committee dealt with offences committed outside of South Africa, witchcraft applications and gender crimes. The subject of the final chapter is what happens next. Will those who were refused amnesty or who did not apply be prosecuted? A few significant themes or debates permeate the text; the extent to which the TRC was victim-centred or perpetrator-friendly; the extent to which the TRC and the amnesty process in particular, contributed to the discovery of 'sufficient' truth, a prerequisite for reconciliation; and the extent to which the TRC and its amnesty process actively attempted to facilitate national unity and reconciliation.

Siviele Ingenieur in Suid-Afrika - 1985

Computing with Words in Information/Intelligent Systems 2 - Lotfi Zadeh 2013-06-29 These two volumes consisting of Foundations and Applications provide the current status of theoretical and empirical developments in "computing with words". In philosophy, the twentieth century is said to be the century of language. This is mainly due to Wittgenstein who said: "The meaning of a word is its use in the language game". "The concept game is a concept with blurred edges". In the first phrase, "the language game" implies the everyday human activity with language, and in the latter, "game" simply implies an ordinary word. Thus, Wittgenstein precisely stated that a word is fuzzy in real life. Unfortunately this idea about a word was not accepted in the conventional science. We had to wait for Zadeh's fuzzy sets theory. Remembering Wittgenstein's statement, we should consider, on the one hand, the concept of "computing with words" from a philosophical point of view. It deeply relates to the everyday use of a word in which the meaning of a word is fuzzy in its nature.

History and Government Form 3:

Theoretical Orientations and Practical Applications of Psychological Ownership - Chantal Oickers 2017-11-27 This book shares the theoretical advancements that have been made regarding psychological ownership since the development of the construct and specifically the practical applications within multi-cultural and cross-cultural environments. Enriched by empirical data and case studies by subject specialists in the field, this book serves as a cutting-edge benchmark for human resource management specialists, industrial psychologists, as well as students in positive organizational psychology and professionals in other fields. This book follows an in-depth view of the most recent research trends in psychological ownership. Offering practical tools of how the psychological ownership of employees could be developed in the workplace to not only enhance the performance of organisations, but to increase the commitment of employees and influence the intentions of skilled employees to remain with their organisations.

Health and Safety for Workers - Judy Malier 1983

Guardian of the Light - Paddy Kearney 2010-06-01 “Denis Hurley was not born in a lighthouse as some people imagine. His father was the keeper of the lighthouse at Cape Point, the guardian of the light that warns the sailors of dangers and guides them away from destruction. Now the son did not follow in his father’s footsteps. But he became a lighthouse keeper too, the guardian of the light that warns of dangers and saves us from destruction. The lighthouse has become a symbol of light and hope and our Archbishop has been doing this work of warning and guiding for the greater part of his life. And he has done it with great faithfulness for which today we give thanks.” - Alan Paton, author of Cry the Beloved Country (Vintage, 2002) Born in Cape Town in 1915 of Irish parents, Dennis Hurley became the youngest Catholic bishop in the world in 1947 at 31 and would later come to be regarded, along with Desmond Tutu, as one of the South African state’s “most wanted” political opponents. His inspiring life as a courageous opponent of South Africa’s apartheid regime for over 50 years and as a champion of the reforms and spirit of Vatican II is chronicled in this indispensable work.

My Life Struggle - Petrus Tom 1985

Twentieth-Century South Africa - Bill Freund 2018-10-31 This unique history highlights South Africa’s complex and dynamic attempt to build a developmental state, an attempt that ultimately faltered.

SCN News - 2002
SKYHOOK: Werner Lossia 2011-10-11 SKYHOOK deals with the spirituality of man, as well as with hidden mind content that influences him daily, often adversely. When Art Painter, the inventor of Nuo - a gas lighter than hydrogen - discovers that he has schizophrenic tendencies, he follows the madly’s cause back to prehistorics times when the Earth was colonized by inhabitants of a strange planet. Art’s journey takes him from the dim reaches of a dangerous past into an unsavory present, where he has to work out his own salvation, and that of those dear to him. Part One of SKYHOOK - Creator’s Fate - is set in ancient Earth times. For Part Two - Embodiment’s Consequences - and Part Three - Duality’s Dilemma - today’s South Africa is the setting.

A scholarly inquiry into disciplinary practices in educational institutions: Connie B. Zulu 2019-12-12 This book is a collection of chapters based on original research dealing with issues of discipline and disciplinary practices in educational institutions. The aim of the book is to provide a scholarly and scientific perspective on the current state of discipline and disciplinary practices in schools and tertiary education settings. The issue of discipline is investigated from diverse paradigmatic and methodological perspectives, presenting empirical as well as also philosophical research. The empirical perspective includes qualitative (poststructural, qualitative (interpretive) and mixed methods (pragmatic), designs and worldviews. This book offers a ground-breaking contribution to the field of learner and student discipline, with insights into disciplinary practices and issues in educational institutions not hitherto researched, such as Technical Vocational Education and Training colleges and universities.

Democracy’s Infrastructure- Antina von Schnitzler 2016-10-25 In the past decade, South Africa’s “miracle transition” has been interrupted by waves of protests in relation to basic services such as water and electricity. Less visibly, the post-apartheid period has witnessed widespread illicit acts involving infrastructure, including the nonpayment of service charges, the bypassing of metering devices, and illegal connections to services. Democracy’s Infrastructure shows how such administrative links to the state became a central political terrain during the apartheid struggle and how this terrain persists in the post-apartheid present. Focusing on conflicts surrounding prepaid water meters, Antina von Schnitzler examines the techno-political forms through which democracy takes shape. Von Schnitzler explores a controversial project to install prepaid water meters in Soweto—one of many efforts to curb the nonpayment of service charges that began during the apartheid struggle—and she traces how infrastructure, payment, and technical procedures become sites where citizenship is mediated and contested. She follows engineers, utility officials, and local bureaucrats as they consider ways to prompt Sowetans to pay for water, and she shows how local residents and activists wrestle with the constraints imposed by meters. This investigation of democracy from the perspective of infrastructure reframes the conventional story of South Africa’s transformation, foregrounding the less visible remainders of apartheid and challenging readers to think in more material terms about citizenship and activism in the postcolonial world. Democracy’s Infrastructure examines how seemingly mundane technological domains become charged territory for struggles over South Africa’s political transformation.

Analytical Chemistry of Uranium- Zeev Karpas 2014-11-21 Accurate uranium analysis, and particularly for isotope measurements, is essential in many fields, including environmental studies, geology, hydrogeology, the nuclear industry, health physics, and homeland security. Nevertheless, only a few scientific books are dedicated to uranium in general and analytical chemistry aspects in particular. Analytical Chemistry of Uranium: Environmental, Forensic, Nuclear, and Toxicological Applications covers the fascinating advances in the field of analytical chemistry of uranium. Exploring a broad range of topics, the book focuses on the analytical aspects of industrial processes that involve uranium, its presence in the environment, health and biological implications of exposure to uranium compounds, and nuclear forensics. Topics include: Procedures of procedures used to characterize uranium in environmental samples of soil, sediments, vegetation, water, and air. Analytical methods used to examine the rigorous specifications of uranium and its compounds deployed in the nuclear fuel cycle. Health aspects of exposure to uranium and the bioassays used for exposure assessment. Up-to-date analytical techniques used in nuclear forensics for safeguards in support of non-proliferation. Energy law in South Africa- Willemien de Plessis 2020-04-20 Derived from the renowned multi-volume International Encyclopedia of Laws, this book provides a systematic approach to legislation and legal practice concerning energy resources and production in South Africa. The book describes the administrative organization, regulatory framework, and relevant case law pertaining to the development, application, and use of such forms of energy as electricity, gas, petroleum, and coal, with attention as needed to the pervasive legal effects of competition law, environmental law, and tax law. A general introduction covers the geography of energy resources, sources and basic principles of energy law, and the relevant governmental institutions. Then follows a detailed description of specific legislation and regulation affecting such factors as documentation, undertakings, facilities, storage, pricing, procurement and sales, transportation, transmission, distribution, and supply of each form of energy. Case law, intergovernmental cooperation agreements, and interactions with environmental, tax, and competition law are explained. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for energy sector policymakers and energy firm counsel handling cases affecting South Africa. It will also be welcomed by researchers and academics for its contribution to the study of a complex field that today stands at the forefront of comparative law.

State of the World’s Volunteerism Report 2015- United Nations Volunteers 2016-07-15 In most societies, millions of people make significant contributions to economic and social development through voluntary action. This report supports a better understanding of volunteerism by exhibiting its universality, scope and reach, and by highlighting new trends in the 21st century. It examines the important contributions in diverse fields such as enhanced livelihoods, social inclusion, social cohesion, disaster risk reduction, governance and political participation. This publication also provides an alternative vision towards a better society. It is expected to lead to enhanced recognition, facilitation, networking and promotion of volunteering worldwide and to an increased recognition of United Nations Volunteers’ critical role in peace and development as well as in norm-setting in the United Nations System.

Good Over Evil- Moche Ikewensi 2003-12 Good Over Evil is a masterpiece of reality of life story, revealing unforgettable human agonies in the colonial racial enslavement in Southern Africa. It highlights racism in action and projects the atrocities of apartheid with vivid accounts of the plights of Africans as meted out by the oppression system. It is the epitome of man’s inhumanity to man and man’s inhumanity to the man of another colour. It is a novel of compelling and compelling and compelling and most of all a memorable history. Being of personal interest to research and analysing the consequences of colonial and racial prejudices imbued by the imperial racism in Africa, this book forms the first part of a two-part series of the atrocities of Apartheid in Africa. The second part is centered on the frontline states, the destabilization tactics of the racist state and Africa’s revolution against the oppressive system. It is a work on its own perspective.
